

EFEN – Known Issues

November 13, 2007

Program Version: 1.0.00

1. Installation for other users – presently, EFEN can only be used by the user who installed it.
2. User Defined Library – user can select another user defined library only when project is closed.
3. Cancel does not work during Windows Import operation.
4. Reports – there are formatting issues, esp. when reports are created in Rich Text File (RTF) format.
5. Handling of incomplete or corrupt weather files
6. Warning for non-consistent parametric runs
7. Slow import from other user defined libraries
8. Improve help system for geometry that does not comply with rules
9. For school building, gym is not shown on the second floor
10. Temporary windows are sometimes visible in a library even though they are not used in a project
11. Filtering during window import is not working
